

CARDEN SCHOOL  
OF FRESNO

## STANDARDIZED TEST SCORES

At Carden School of Fresno, we do not believe that national testing shows the full scope of a student's abilities. It is, however, a fair measure of improvement and overall performance. CSOF administers the Stanford Achievement Test Series, Tenth Edition (SAT 10) for student performance assessment.

A summary of student averages for the 2020-2021 academic year is listed below.

First Grade:	The average CSOF first grade student performed at a 2.1 (second grade, first month) grade equivalent and in the 57 <sup>th</sup> percentile (national average).
Second Grade:	Students averaged a 3.6 grade equivalency and in the 65 <sup>th</sup> percentile.
Third Grade:	The student average was a grade equivalent of 5.4 with a 65 <sup>th</sup> percentile rating.
Fourth Grade:	Average student performance was in the 62 <sup>nd</sup> percentile with a grade equivalency of 6.1.
Fifth Grade:	The average student scored in the 87 <sup>th</sup> percentile and at a 10.1 grade equivalency.
Sixth Grade:	These students averaged in the 65 <sup>th</sup> percentile with a grade equivalency of 11.2.
Seventh Grade:	The average grade equivalent was 11.4 and students performed in the 73 <sup>rd</sup> percentile.
Eighth Grade:	Our eighth graders scored at the 8.7 grade equivalency and in the 59 <sup>th</sup> percentile.

The overall average percentile ranking for the CSOF students tested in the 2020-2021 academic year is 67. As a whole school, our students scored at 2.2 grade levels above the national average.
